November 12, 2014

The Research Committee of the EAGT declares to officially fully support the research project called EVALUATION OF THE EFFECTS OF GESTALT THERAPY ON DIFFERENT DIMENSIONS OF PERSONALITY WITH THE TEMPERAMENT AND CHARACTER INVENTORY (TCI 125) OF C. R. CLONINGER which is conducted by the AGL of ILFC and Gestalt + in partnership with the CMRR of Limoges, France.

We consider this scientific study on the effectiveness of Gestalt therapy for a very needed project for the whole European Gestalt community, which could be extended to the international level in the near future.

A handwritten signature in black ink, appearing to be 'JR', is written over a light blue rectangular background.

Jan Roubal, M.D.

Chair of the EAGT Research Committee
